

Basset Hound Health Survey (UK) 2011

List of Clubs participating in this survey: The Basset Hound Club / The Basset Hound Club of Scotland / The Basset Hound Club of Northern Ireland / The Basset Hound Club of Wales / The Midland Basset Hound Club / The Lancashire Yorkshire & Cheshire Basset Hound Club / The Hadrian Basset Hound Club / The South of England Basset Hound Club

We ask your help in completing this survey on the general health of our breed. This will help us pinpoint the most important health issues affecting our Basset Hounds today. The survey is completely anonymous as we just want facts and figures., no names. Audrey Carter has kindly offered to help collate this information together with a veterinary surgeon. We will publish results on the web so you are kept fully in the picture. The list of problems may seem rather long and worrying - this does not mean that all Basset Hounds suffer from them! We just want to find the most prevalent problems affecting our breed so we can investigate further.

Please complete **one form for each hound**. Further copies can be downloaded from many of the Basset Hound Club websites. If you know someone with a Basset Hound please give them a form to complete - the more information we have the greater our knowledge.

Only tick a problem box if a condition has been diagnosed by your vet - We need our survey to be factually correct so no guesswork please! If you are unsure please contact your vet. You can add further details of a particular problem, or one that is not mentioned, at the end of the survey. We are also including Basset Hounds that have died in the last 15 years. Please complete this form even if your Basset Hound has never had any of the conditions mentioned - we need healthy details as well!

Thank you so much for helping us in the important work of keeping our Basset Hounds as healthy as possible. .Please complete and send your form(s) by September 10th 2011.

Send to: Sandra Thexton, The Elms, West Yeo, Moorland, Bridgwater, Somerset, TA7 0AU

Or email to: - bassethealth@yahoo.co.uk

Age of hound now

Sex Male / Female

If deceased in the last 15 years age at death
